

10 June 2022

Dear Family Members and Resident Representatives We have a number of new cases amongst our residents and staff taking our total Covid positive residents to 15 and 6 staff.

We have been in ongoing discussions with the Public Health Unit and they are supportive of us keeping Caringbah wing closed (10 Covid positive in this wing) and keep all other wings open with only the infected residents in isolation.

They have also agreed for us to reopen our home visitors except to infected rooms/residents or Caringbah Wing.

Visitors must go directly to and from their resident's room and they must not go to visit other residents or areas of the home.

We will be doing ongoing testing of residents (every second day) and staff (every day) until this outbreak is over.

All infected residents and staff are required to be isolated for 10 days.

We will continue to support all our residents but especially those in isolation.

We will continue to update you as the situation evolves.

Kind Regards

Peter Whittall

CEO
